

PleasePrEPMe vets CA providers and shares the data with the national PrEP provider directory. Additional information is collected on CA providers: do you serve people under 18 and do you offer PEP.

The national PrEP provider directory launched in September 2016 at PrEPLocator.org. In May 2018, that database transitioned to being managed by CDC's NPIN. NPIN is responsible for the listings outside of CA and shares the data with PleasePrEPMe through an API.
