**California PrEP Navigator Manual**

Free online resource to assist PrEP navigation staff in California.

This publication provides a wide range of information to aid the daily work that frontline staff engage in to support PrEP access and adherence.

This is a living document. Frequently updated with changes in healthcare landscape.

CA PrEP Navigator Google Group to answer challenging questions, promote events, share resources.

<https://pleaseprepme.org/prenavigatormanual>

On August 14, 2017, [PleasePrEPMe.org](https://pleaseprepme.org) and [Project Inform](https://projectinform.org) launched a new PrEP navigation publication, *Helping People Access Pre-Exposure Prophylaxis*.

This manual provides in-depth information to frontline staff within California on the various aspects of supporting people who seek PrEP to get and maintain their prescriptions and related health care. The manual is meant to establish baseline knowledge for staff who are new to PrEP navigation and to fill in gaps in knowledge for others.

Three sections describe the following topic areas: PrEP research, PrEP care and PrEP navigation. The manual is framed within the context of health care programs unique to the state of California, although much of the content can be used by other states as well. The manual is free to download at these links ([English](#), [Spanish](#)) and then download to your desktop.

This “living” document will be updated as the PrEP health care landscape changes. To let you know when new sections have been added or current sections have been updated, please [click here](#) to provide us your contact information at the bottom of the page.
