

PleasePrEPMe.Global launched in May 2017 as a database of PrEP providers hosted as a searchable, web-based directory in the Google Maps platform. PleasePrEPMe.Global aims to be a hub for PrEP access by providing: 1) a searchable map of PrEP providers, 2) individual resource webpages for each country. The project is a crowd-sourced effort which relies on relationships with advocates to reach providers and PrEP users. As of May 2018, there are 535 PrEP provider listings in 29 countries with over 6,000 map views from 1,400 website users.
